Dan

Absolutely. I am to reach out to the two fellow National Data Team members that assisted in the development of this viewer along with our GIS developer, Janine Latham.

Our next steps would be to have a quick conference call to discuss the publication of the viewer. We can either share the link or embed the viewer in the webpage.

Thanks,  
Dan

Dan, can you and Josh get together and talk GIS to GIS?  
If there are questions, let's get them resolved.

Yes, I used the data that was posted on the public page and created feature layers in the GeoPlatform, then added to the map.

Looping in EOC GIS-data folks to help so that I don't misspeak. However, if you're asking if this is pulling from public data, it is. It's the data we have posted on this page.

Dan,

Mellissa Harrison showed me the viewer that was posted on the HQ website and said you would know the background on the viewer. I am working as the EUL supporting the Area Command and R8 IMT and was wondering which data is populating this viewer and is this from OEM? It appears that it's a mapped spreadsheet but I wanted to make sure.

Thanks

Dan
